

## Plan for raising the Achievement of African American Students

African American student’s academic performance levels are the lowest of all ethnic and racial groups who attend school in Sacramento City Unified School District (SCUSD). The African American community has reached a point where it believes that all planning for improvement must be detailed and specific to African American children. Thus, LCAP planning for 2018/19 must be unapologetically explicit in its goals, objectives, and activities for African American children. To achieve the goals SCUSD must include definitive metrics to measure progress in an ongoing fashion. The result, as Linwood Unified and Riverside USD recently experienced, improved academic outcomes for all students.

The Black Parallel School Board invited over 31 African American Community Based Organizations and other educational and professional organizations (Sacramento) to attend a meeting to set priorities for African American Students attending schools in SCUSD. Over 25 of these representatives attended and developed the following goals, objectives, and activities that will be presented to staff and board members for inclusion in their Local Control Accountability Plan.

### Goal I
